NEAWI **Green** Manufacturing Seminar

Turn Wood Waste Into Profit

As material cost rise, the woodworking industry needs to reconsider the way we look at wood waste disposal from operational cost to an energy product. Join Michael Jungblut, product specialist for Stiles Machinery, as he engages in a discussion about how briquetting wood waste is ideal for all woodworking industry segments and how densified wood waste serves as a prospective energy alternative.

Finishing Advances to Meet Current & Future Environmental Demands

We will define and discuss alternative "Green" coatings systems and finishing equipment that are available to those manufacturers that must change finishing methods in order to meet LEEDS certification or regulatory requirements. There is considerable conflicting ideas of "Green" within the finishing industry that will be debated and hopefully clarified.

Presented by

Robert J. Kostelnik, Cefla Finishing America, Inc.

Mr. Kostelnik has over 40 years of experience in the Industrial Wood Finishing Industry. After six years in the laboratory as a formulating chemist of wood coating, Bob moved into the field of technical service, and then various sales and marketing management positions in the coating industry. He started his first UV line for wood finishing in California in the early '70s, and in 1981 founded HK Research, a manufacturer of wood coatings and polyester gel coats. Bob added machine applications to his chemical background, when he joined Stiles Machinery in 1997. Mr. Kostelnik currently serves as the Director of Technology and Education with Cefla Finishing America, Inc.

Presented by

Michael Jungblut, Stiles Machinery

Michael Jungblut is a product specialist with Stiles Machinery, Inc., where he has worked for over 10 years in sales, sales management, and product management. Mr. Jungblut specializes in Stiles Machinery's Green Initiatives.

Green Project Specifications

Have questions about how to navigate green and LEED specification requirements on projects? Bruce Chapin and Dan Martin will shed light on topics including the US Green Building Council and the LEED Rating System.

Presented by **Bruce Chapin & Dan Martin**

Bruce Chapin, Atlantic Plywood

Bruce has been with Atlantic Plywood for over 26 years. He is a Past President of NEAWI and is a LEED Accredited Professional specializing in New Construction.

Dan Martin, Consultant

Dan Martin has spent over a decade in the Carpenter's Union working for various commercial and interior finish contractors. Since 1989, Dan has worked for New England AWI member shops in various capacities including Production Manager, Senior Project Manager, Operations Manager, Estimator and Business Development Manager. Mr. Martin is also certified by the US Green Building Council as a LEED Accredited Professional specializing in Commercial Interiors, and is currently self-employed providing consulting services to millwork shops.

Pre-Registration is Required NEAWI Active & Associate Members **\$35** In advance **\$40** at the door.
Non-N.E. Chapter Members **\$90** (\$50 credit towards 2009 Membership)

Submit Registration Form via Email or Fax & Mail Payment (see Registration Form for Details)
